Fact:

Trade is a fundamental economic concept for every country, involving the exchange of goods and services through compensation paid by buyers to sellers, or through the direct exchange between sellers and buyers. Nowadays, the world is experiencing rapid growth in e-commerce. According to Statista, retail e-commerce sales reached up to 4.28 trillion US dollars in 2020, highlighting its significant expansion. This has led to online shopping becoming one of the most popular online activities. Simultaneously, the size of the cryptocurrency market is also expanding. There's a widely held belief that e-commerce and cryptocurrency complement each other due to their shared digital realm. This synergy is increasingly appealing to the digital user

SHL - Shelling

Building future of
online payments

\$SHL The token is a contract based on its own source-code, which called a 'smart contract'. Shelling token built on Smart chain network and the developer token standard is BEP-20 Binance smart chain to ensure safe deployment. There are different possibilities that offered by Shelling tokens such as having it as coin that can be used through Shelling payment platform which gives holders the ability to buy and sell goods and services. In addition, SHL token can be used as investment on Shelling payment system as we aim to make it valuable, solid and trustworthy base for economic exchange.

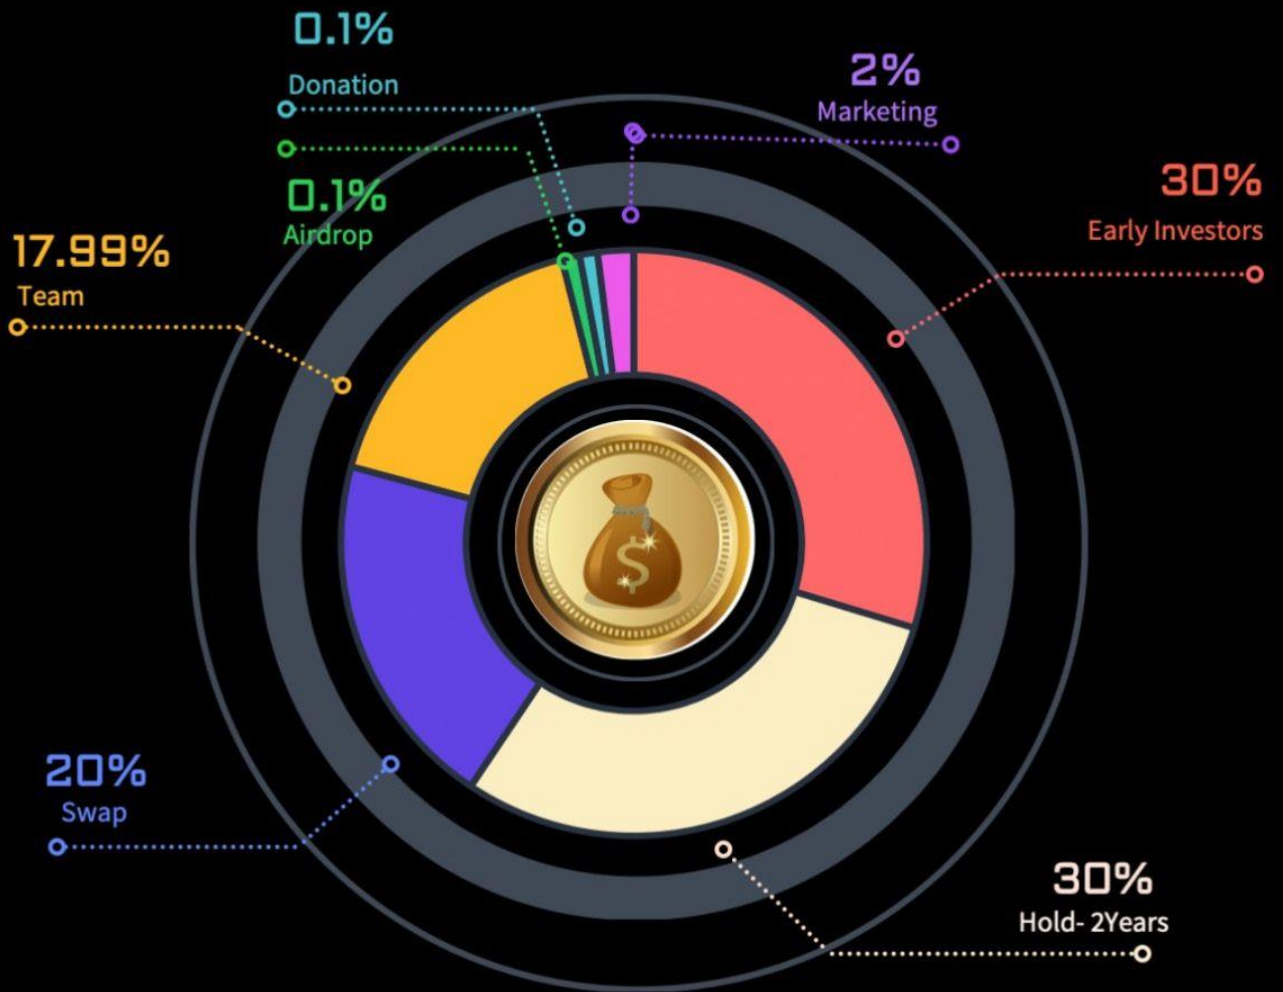

A Blockchain is a distributed database that is shared among the nodes of a computer network. As a database, a blockchain stores information electronically in digital format. Blockchain is technology promise to build secure and fast processing service. The growth of this technology is affecting many aspects such as countries, Banks, companies, and individuals. Wherefore, Shelling payment system is building payment platform, which helps to improve the way companies do their work by increasing revenue and decreasing expense using Blockchain technology.

This gives an overview of SHL Tokenomics.

Total Supply (1,000,000,000,000 SHL)

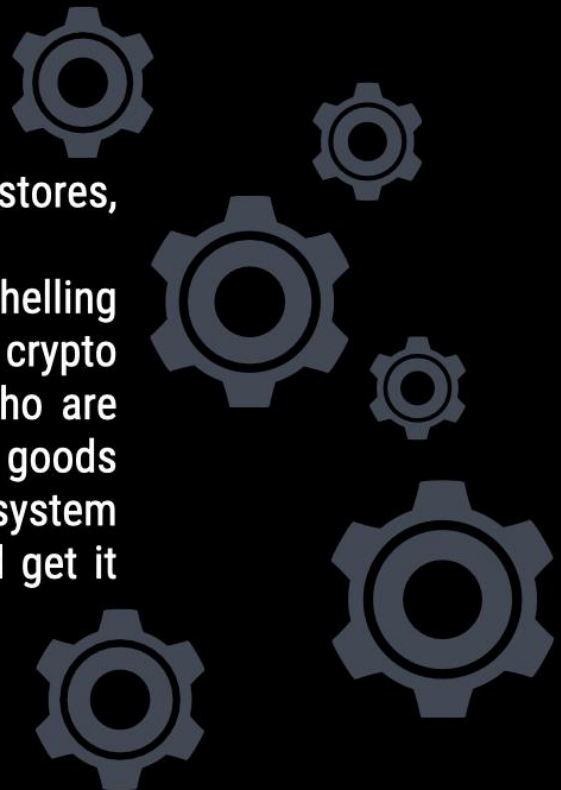

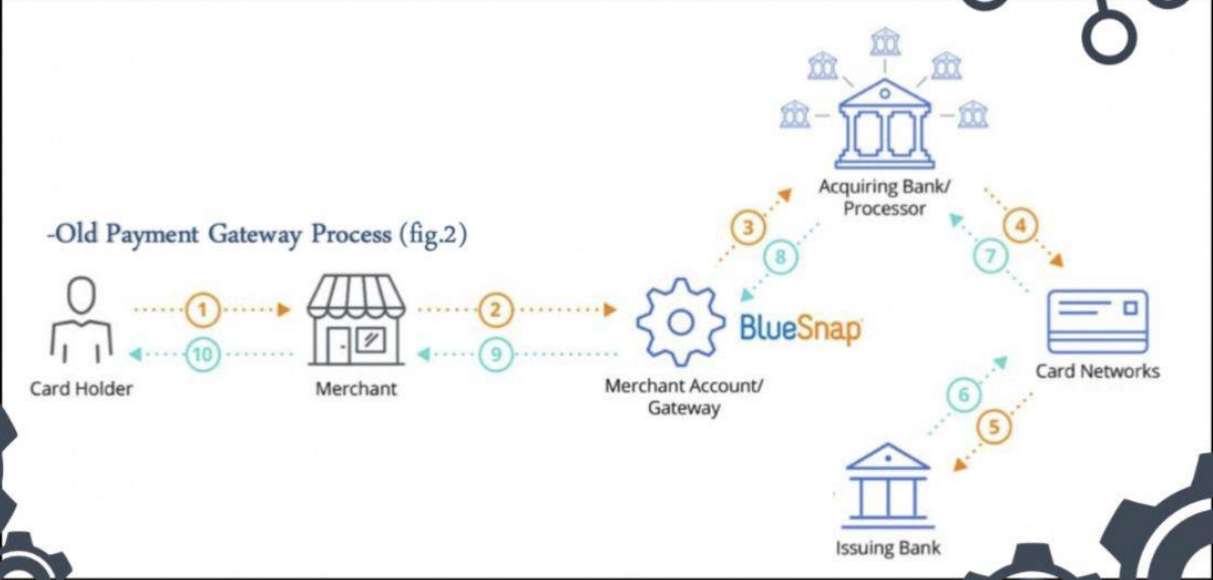

Project:

According to the high demand for digitally based payments among an online consumer base, we decide to build cryptocurrency payment platform to enable merchants to accept cryptocurrency payments on their online stores, therefore enabling businesses to increase revenue.

Buyers would be able to connect their online shop to Shelling payment platform and they will be able to accept crypto currency \$SHL. It is an additional option for those who are looking for a fast and more convenient way to pay for goods and services. In addition, through Shelling payment system people will be able to send invoice to any person and get it paid with crypto.

Shelling payment platform will be able to do the entire payment process, just like credit card processors do however with more features:

- 
- **Fast transaction:** A cryptocurrency transaction is processed immediately, unlike credit card transactions, which can take a few days. Fast transactions can help streamline business's cash flow.
 - **Low fees:** Accepting cryptocurrency as a payment method associated with low fees on each transaction and which is less than credit card.
 - **Security:** A cryptocurrency transaction cannot be reverse unless the merchant authorizes it. This provides retailers with more security when it comes to ecommerce fraud.
 - **Expand market:** When buyers accept cryptocurrency as a payment method, they will open up a whole market of tech consumers.
 - **Exchange:** Shelling payment will facilitate the transfer of cryptocurrencies into fiat currency or any other cryptocurrency.
